Company logo:

We are building contractors who have been instrumental in helping many people build their new homes or make successful alterations to their existing homes. We successfully built our first house in 1983 which means that, with more than 20 years experience, we are more than capable of helping you with your project.

At ERS Construction, we are a dynamic father-and-son team with two main focuses: quality workmanship and customer service. One of the major reasons for our success is that we have a hands-on management style. We operate in the following areas in South Africa: Somerset West; Strand, Gordons Bay, Stellenbosch, and Cape Town.

We are very fortunate to have a number of very skilled people in our company giving us the flexibility to be able to do a wide variety of different types of projects. We are an NHBRC registered company and will not only successfully complete your project, but we can also arrange for an architect/draughtsman to meet with you to draft the necessary plans, and arrange for these to be approved by the local municipality.

In the complex South African building environment today, it is essential to use the right people for your project to ensure its success. At ERS Construction we use the wealth of experience that we have available in our construction company and act as project managers to manage all the facets of your building project from inception to completion.

We have done this very successfully in the past for clients who don't want to be bothered with the complexity of a building project or in cases where the client is living abroad or elsewhere in South Africa and wants someone that they can trust to run their building project. Because of the current building culture in South Africa, it is essential to have someone with a lot of experience acting on your behalf and looking out for your best interest.
